DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in **narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. **The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided.** The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

Claim 1 is objected to because of the following informalities: in lines 11-12, please correct the subject matter "said increase" to --said increased--. Appropriate correction is required.

Claims 10-12 are objected to because of the following informalities: insert the word "mobile radio" between "A" and "system" in line 1 of each claim for consistency. Appropriate correction is required.

Claims 8-25 are objected to because of the following informalities: the claims depend on a method claim. The claims are directed towards a mobile radio system or

apparatus claims, the applicant is advised to amend the claims to reflect the apparatus claims. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the claim appears to be a method claim but there are no method steps are claimed in the body of the claim.

Claim 2-25 are rejected for dependent of a rejected claim.
